BADHUSHA YOUSEF

Ernakulam, Kerala, India badhushayousaf521@gmail.com 8086930684 in/badhusha-yousaf badhu521.github.io/Portfolio.com/

SUMMARY

Security-conscious Junior Full-Stack Developer with hands-on experience in Java (Spring Boot) and Hibernate. Specialized in building RESTful APIs and responsive frontend interfaces while maintaining a strong focus on defensive security practices like SQL injection prevention and secure authentication. Proven ability to deliver end-to-end web applications with clean, modular architecture.

EXPERIENCE

Java Trainee

Safecare **September 2025 - November 2025, Kerala,Muvattupuzha**

- Developed Java-based web applications using Core Java, Servlets, JSP, AJAX, and Bootstrap.
- Built multiple full-stack projects to understand backend logic, REST communication, and frontend integration.
- Implemented form validations, dynamic content loading using AJAX, and responsive UI using Bootstrap.
- Practiced debugging and troubleshooting using logging and systematic error tracking.
- Focused on writing clean, modular, and maintainable code following basic OOP principles.

PROJECT

arise ai

Personal Project (Self-Initiated) • github.com/badhuio/arise • February 2026 - Present

- Designed and developed Arise AI, a personal AI assistant platform for managing daily tasks, research, and digital content.
- Implemented task scheduling features including workout tracking, reminders, and productivity management.
- Built structured data storage modules allowing users to manage videos, music, and documents.
- Developed secure backend services using Java and integrated dynamic frontend components.
- Applied modular architecture principles to separate business logic, service layers, and UI.
- Implemented user authentication and session management for secure access.
- Focused on scalable design to support future AI-driven enhancements.
- Architected a secure personal AI assistant by implementing Spring Security to mitigate OWASP Top 10 risks, specifically focusing on Broken Access Control and CSRF protection and etc...

Student Management System

Independent Project • github.com/badhuio/school-management-system • September 2025 - November 2025

- Designed and implemented a Student Management System using Java, Spring Boot, Hibernate, MySQL, and Bootstrap, facilitating end-to-end CRUD operations for student records.
- Designed and implemented backend logic using Core Java, Servlets, and JDBC.
- Integrated MySQL database for persistent storage and efficient data management.
- Implemented secure student registration and login with database validation.
- Built complete CRUD operations for managing student records.
- Utilized AJAX to enable dynamic content updates without page reload.
- Designed a responsive and user-friendly interface using Bootstrap.
- Structured the application following basic MVC architecture for better code organization.
- Applied input validation, exception handling, and error management to improve reliability.
- Deployed and tested the application locally using Apache Tomcat server.
- Modernized system architecture by migrating to Spring Boot and implementing Input Sanitization to prevent Cross-Site Scripting (XSS) as per OWASP guidelines

Hospital Management System

Assessment Project (Self-Initiated) • December 2025 - December 2025

- Designed and developed a full-stack Hospital Management System using Java and modern web technologies.
- Implemented secure patient registration, appointment scheduling, and record management modules.
- Built RESTful backend services and integrated frontend components using AJAX for dynamic data updates.
- Developed complete CRUD operations with structured database integration.
- Designed entity relationships and service layers following modular architecture principles.
- Applied validation, exception handling, and clean coding practices to ensure system reliability.
- Created a responsive user interface using Bootstrap for better user experience.
- Developed a secure healthcare platform utilizing Hibernate/JPA to eliminate SQL Injection and integrated OWASP-recommended hashing algorithms for sensitive patient data

EDUCATION

Bachelor of Computer Applications (BCA)

Mahatma Gandhi University • Kerala,Kottayam • 2025

- Developed a Football Community Website using Python, HTML, CSS, and JavaScript as part of my college project.
- Built features enabling regular users to upload football videos and view match schedules.
- Implemented a professional coach section for uploading coaching content and tutorials.
- Designed a user-friendly interface and integrated backend functionality to support dynamic content uploads, content management, and future match scheduling.

Cybersecurity (Ocsp)

Offenco Hackers Academy • Kochi • 2025

- Acquired practical understanding of network protocols, firewall configurations, and intrusion detection mechanisms.
- Analyzed and understood exploitation techniques such as SQL Injection, XSS, and brute-force attacks.
- Studied penetration testing methodologies and vulnerability assessment processes.
- Implemented secure coding practices to mitigate common web-based attacks.
- Applied defensive security principles including encryption, hashing, authentication, and authorization mechanisms.
- Gained exposure to ethical hacking concepts and security auditing fundamentals.

Java Training

Safecare (3-Month Java Training) + Self-Learning • Kerala,Muvattupuzha • 2025

- 3-month structured Java training at Safecare with hands-on development practice.
- Designed and implemented web applications with CRUD operations and database connectivity.
- Knowledge of network security, web vulnerabilities (SQL Injection, XSS), and defensive security techniques.
- Experience integrating frontend and backend systems using AJAX and REST APIs.
- Focused on building scalable and secure application architectures.

SKILLS

Languages: Java

Frameworks: Spring Boot, Spring MVC, Hibernate, JPA

Frontend: HTML, CSS, JavaScript, Bootstrap, jQuery

Database: MySQL

Tools: Git, GitHub, Maven, Postman, Apache Tomcat

Security: Authentication, Authorization, SQL Injection Prevention

Operating Systems & Networking: Linux Fundamentals, Networking Basics

Cybersecurity: Cybersecurity Fundamentals, Secure Coding Practices, Web Vulnerability Awareness (SQL Injection, XSS)

Soft Skills: Strong Logical Thinking, Fast Learning Ability

Languages (Spoken): English, Malayalam, Tamil
